## **GlaceEMR Awarded 35.7 points in NCQA PCMH 2014 Prevalidation AutoCredit**

Waterbury, CT – December 10, 2015 - Glenwood Systems, LLC, GlaceEMR v5.0 has been PCMH Prevalidated by NCQA to receive 35.7 points autocredit toward NCQA’s PCMH 2014 scoring (Patient-Centered Medical Home.)

[Glenwood Systems](#) is proud that GlaceEMR v5.0 scored so highly. We stand ready to help any qualified Glenwood customer achieve PCMH accreditation. [NCQA](#) PCMH Prevalidation includes a rigorous evaluation of a submitted health IT solution’s functionality including but not limited to, reporting functions, report examples, screen shots, live demonstrations and other relevant documentation. Based on the review of information submitted above, NCQA approves or declines autocredit based on PCMH factor-level requirements and designates for which factors a product is able to “support” practices.

“By providing software that helps physician practices build the patient-focused, coordinated care infrastructure expected of NCQA patient-centered medical homes, [Glenwood Systems](#) is helping practices be part of modern health care’s most important transformations,” said NCQA President Margaret E. O’Kane. “Medical homes are the way of the future, and Glenwood Systems is helping practices get there.”

### **About Glenwood**

Glenwood Systems is a privately held software development firm providing web-based medical practice software, billing services and custom software solutions to manage clinical documentation, workflow and revenue.

Glenwood Systems emphasizes product excellence, a high level of customer service and exceptional stakeholder value. Founded in 1998, Glenwood Systems has established itself as a first to market leader offering (EHR) software, practice management, physician billing services and custom software solutions. More information about Glenwood and the Glace family of products can be found at [www.glenwoodsystems.com](http://www.glenwoodsystems.com) or contact [Ron Flormann](#).

### **About NCQA Labs**

NCQA’s PCMH Prevalidation evaluates Electronic Health Record (EHR) systems, advanced registries, population health management tools, care coordination tools, patient engagement tools and other related health technology solutions providing functionality that completely meet or support factor-level requirements within applicable NCQA PCMH Standards. If a health IT solution completely meets the functional requirements of a given factor, automatic credit,

“autocredit” points are awarded. If the health IT solution provides significant functionality that aligns with the requirements of the PCMH standards for a given factor, but does not fully meet the factor level requirement, a “supporting” designation is awarded. Once a solution receives autocredit or a supporting designation for one or more factors, it is considered “Prevalidated.” Practices that use an NCQA Prevalidated system with autocredit awarded to a factor do not have to submit documentation for that associated factor within their PCMH Survey.

NCQA is a private, non-profit organization dedicated to improving health care quality. NCQA accredits and certifies a wide range of health care organizations. It also recognizes clinicians and practices in key areas of performance. NCQA’s Web site ([www.ncqa.org](http://www.ncqa.org)) contains information to help consumers, employers and others make more informed health care choices.
